Employment History

Employer Young Enterprises
Period March '19
Role Volunteer

Key Functions

This voluntary position was to assist the lead from the charity in delivering sessions throughout the day to 160 Secondary School students at their School in Andover, along with another 7 volunteers, on business skills and attributes for the real world. This was centred around practical exercises over the course of the day in which they produced a business plan, design model and delivery of their pitches at the end of the day with an award ceremony.

Employer Michael Leese Electrical
Period Nov '18 to current
Role Electrical/Fire Alarm Inspection and Compliance Engineer

Key Functions

This role is part-time, allowing me to focus on my coding career, subcontracting to various clients across the South of England.

Responsibilities:-

Ensuring commercial properties Fire Alarms are tested and inspected with accordance to BS5839-1 as well as ensuring Emergency Lighting is tested and inspected in accordance with BS5266-1.

Installing and maintaining emergency systems.

Providing documentation, certification and quotations for inspections, installations and remedial works.

Travelling between sites.

September '18 through October '18 spent fulltime studying my Level 5 Diploma in Software Development with the Code Institute, so as to really kickstart my learning. This has then been continued on a part time basis since then, whilst splitting my time between work, family and study.

I have completed some projects on GITHUB and have successfully launched my First Milestone Project, along with some other projects that I have used as training exercises.

Previous Employment of 15years in Electrical Industry. Running my own business, working for national and multi-national companies as well as smaller local firms within the industry.

Hold a UKAS Accredited Licence for Electrical Installation and Inspection. NAPIT 26038.

MICHAEL LEESE TMIET

Work Skills, Interests & Personal Qualities

I am a dedicated and self-motivated person, who has self-funded all the training/courses that I have been on so far, improving my career prospects and gaining invaluable knowledge and experience within both the Electrical Industry and Software Industry.

Having developed a simple software program for a switch, that I have not further developed past the working prototype stage, I had some interest in coding, so undertook the 5 Day Coding Challenge. Having completed the Code Institutes 5 Day Coding Challenge, I found that I really enjoyed the experience and had an interest in developing my career further within this field and gaining knowledge and understanding that would lead to a role. I have decided that learning new skills and gaining a higher level of knowledge in the technology industry is something I enjoy and would like to take further.

Safe working and good work discipline, organisation, observation, attention to detail are the main points that I instilled in myself and staff. I am a good team player, who enjoys working within a team environment, assisting the team in completing tasks and projects and also someone who can work using their own initiative on their own as required.

I have good communication and IT skills which I have utilised in all aspects during my career, I have current working knowledge of the following Software and Programming Languages that I have used successfully to create projects and collaborate with other students in Hackathons;

• HTML5	• CSS3, using Flex Box
• Javascript ES5 and ES6	• Markdown
• Bootstrap	• GITHUB and GIT
• Cloud9 IDE	• Ubuntu
• BASH	• Google Chrome Dev Tools
• Firefox Dev Tools	• Microsoft Edge Dev Tools
• TinyPNG	• Slack
• Zoom	• Trello
• Fontawesome	• Google Fonts

I enjoy spending time with my family and my dog. Weather permitting, going out on my small speedboat, that I refurbished myself, catching fish and taking in the beautiful views and sea air around the Solent. I enjoy smoking meats in my brick smoker, that I hand-built in my garden, especially cooking hams for people at Christmas. I enjoy travelling and seeing other cultures, experiencing authentic cuisine. I enjoy all types of music from Classical to Rock, going to gigs and tours when I have the time, the last tour I saw was Guns N Roses in London with my Wife.
